

Company Introduction

GE IN TAIWAN

Who we are

GE, the 130-year-old energy pioneer. Our unwavering commitment to powering the planet, now fully focused on the energy transition. No company has the unique combination to pioneer what's next – just as we have before. As we answer the call with renewed purpose and vigor, we are moving our GE energy businesses—including Renewables, Power, Digital and Energy Financial Services — under one banner to deliver a united, focused, one-of-a-kind force: GE Vernova. Together, with our customers and partners, we will chart the course to a better future.

What is our mission

GE's newly defined Purpose is “We rise to the challenge of building a world that works.”

Our History in Taiwan-*GE is closely related to the development and construction in Taiwan.*

GE has been playing an important role in supporting the development of Taiwan since 1976. Our latest-generation gas turbine technology is helping to keep power running for the country's people and businesses, our aviation technology helps power 80% of Taiwan's commercial jets, and we provide healthcare products and services that address the health needs of Taiwan's citizens. Today, GE's footprint in Taiwan includes ten offices across eight locations, including more than 450 employees in Taipei. With our global experience across diverse industries, GE is well-positioned to support Taiwan's 5+2 Industrial Innovation Plan, which focuses on seven industries and projects that will promote innovation, create high-income job opportunities, and support balanced development in high-value business sectors.
